## AZURE MIGRATION SPECIALIST

Focus at current stage is on:

New development focusses on migration of existing system into Azure)

Setup development pipeline (dev-test-prod)

Gather and formalize functional requirements

Define hardware requirements, system configuration, required software.

Design, develop, test, document and launch FRAS application software

Relevant knowledge, skills, competences & desired education level

Experience with migrations to the cloud (preferably to Azure Cloud)

Able to work with the business and understand their high-level wishes.

Able to coach the business in finding out what they want, e.g. propose alternative ideas, do demos, write mock ups, create prototypes.

Able to translate business wishes into formal requirements

Able to define and document data models, UML diagrams to document the system and explain the functionality.

Proven track record in single handily setting up small scale systems (hardware + application) before.

Must teck stack:

Experienced with Azure Cloud and migrations

Configure Azure DevOps, GIT, CI/CD

Configure test, acceptance and prod using CI/CD

Fluent in SQL Server and SQL to set up a database

Knowledge on how to extract data from systems, transform and store data in Azure storage

Nice to have:

Familiar with PowerBI or similar, to guide on how the reports should be migrated

Able to setup the system, install and configure all software, configure external interfaces including networking, certificates and protocol settings and self-developed software

**Locatie: omgeving Amsterdam / Opdracht: inhuur**

***Een intakegesprek wordt standaard ingepland alvorens het cv eventueel bij de opdrachtgever wordt voorgesteld, bovendien zal er minimaal één referentie van je gevraagd worden. Wil je meer informatie? Neem dan snel contact op met Marcel Christoffel via mail:***
