JAVA DEVELOPER

Together with your team you are responsible for changing and running your Java / applications. This requires a specific and challenging mind-set: the ability and willingness to have responsibility for the full development process, from requirements to the (continuous) delivery pipeline, up to running in the production environment. You do not only focus on realising business requirements but also take operational and continuous delivery requirements into account, such as security, maintainability and test automation.

Relevant knowledge, skills, competences & desired education level
Your profile:
Minimal 5 years of Java EE Development, Java 8 or higher, JSP/JSTL
Minimal 3 years of experience with Spring4 (or higher) Spring MVC, Spring Boot and JPA/Hibernate
Experience with CI and CD tools like Jenkins, XLR/XLD or equivalent.
Experience with writing (J)Unit tests and mocks, either manually or using mocking frameworks like Mockito.
Websphere 8.5 or equivalent Enterprise Application Webserver.
Git and Gitflow way of working.
Experience with enterprise level Databases, for example Oracle.
Experience writing functional tests using automated testing frameworks like Selenium, Karate and/or Cucumber.

Preferably also have experience with:
Security Scanning tools like: NexusIQ, SonarQube and Fortify.
Ansible.
Azure or similar Cloud Environments (Amazon).
Jira/Confluence.
Linux System administration for RHEL (or equivalent).
Experience and a passion for Information Security solutions especially in the area of Privileged Access- or Identity and Access Management

Non technical skills:
Experience with Scrum/Agile way of working.
Pro-active attitude: spots problems beforehand and takes initiative to fix this.
Professional communication level, both spoken and written, in English (Dutch is nice to have);

Locatie: omgeving Amsterdam / Opdracht: inhuur

Een intakegesprek wordt standaard ingepland alvorens het cv eventueel bij de opdrachtgever wordt voorgesteld, bovendien zal er minimaal één referentie van je gevraagd worden. Wil je meer informatie? Neem dan snel contact op met Marcel Christoffel via mail: marcel@olifantconsultancy of bel: 06-50237960
